Christian Palladini

Software Engineer

Rome, Latium, Italy hello@christianpalladini.me christianpalladini.me

About.

Software Engineer specializing in designing and developing scalable web applications and enterprise systems. Adept at combining modern frontend ecosystems with solid backend architectures. Experienced in modernizing complex legacy platforms through microservices, domain modeling, and clean architecture practices. Committed to crafting solutions that are user-focused, maintainable, and aligned with long-term business goals.

Work Experience.

Software Engineer · Links Management & Technology S.p.A.

Sep 2022 – Present ▪ Rome, IT ▪ Full-time CURRENT

- Tech Lead within the company's competence center, providing technical direction and coordinating development teams across multiple client engagements
- Mentored engineers and drove code reuse, engineering best practices and quality standards across teams
- Authored and maintained detailed technical documentation for developers and stakeholders

PROJECTS

Sintesi — Regione Puglia

Led and coordinated a team of 4 engineers in modernizing a regional employment-services platform, guiding the transition from a legacy monolith to 15+ microservices. Established DDD and Clean Architecture standards to improve maintainability and test coverage, while remaining hands-on in development.

Spring Boot 3 | Java 21 | Kafka | SQL Server | Kubernetes

Sifer — Regione Emilia-Romagna

Tech Lead on the full rewrite of Sifer, leading a 4-engineer team and setting the technical direction and delivery cadence. Architected a reusable component library of 25+ components, later adopted by other teams across the competence center.

Symfony | Nuxt | PostgreSQL

Side Projects.

Omarchy FortiVPN DEVELOPER TOOLS 2026

FortiClient VPN status in the Omarchy bar: state, IP, uptime and traffic, with one-click disconnect and a shortcut into the SAML login.

Fatturazione Elettronica Aruba LIBRARIES & SDKS 2026

TypeScript SDK for Aruba's Electronic Invoicing API v2. Send, receive and manage Italian electronic invoices through the Sistema di Interscambio.

Nuxt UI Better Auth Template LIBRARIES & SDKS 2025

A starter template for Nuxt 4 applications, wiring up Nuxt UI, Drizzle ORM, Better Auth and Resend so authentication works from the first commit.

Dark Discord Theme for VS Code EDITOR THEMES 2025

A theme for VS Code inspired by Discord's dark palette.

Dark Discord Theme for Zed EDITOR THEMES 2025

The same palette, rebuilt for Zed's theme format.
